

MoneyCheck TTG-690

Philips MoneyCheck TTG-690 is designed for under the counter installations. Special note paper absorbs UV light and does not appear fluorescent under a ultraviolet light. Counterfeit currency usually appears very bright under ultraviolet light. The device can also be used for examining security documents such as cheques, credit cards, bankdrafts, passports, certificates etc.

A separate on/off switch enables the device to be discretely operated.

Philips TL-9w twin lamp is very powerful and long lasting.

AC adapter is integrated in the plug.
