

MoneyCheck TTG-950

Philips MoneyCheck TTG-950 has proved to be the most successful and reliable system for detecting forged currency. Special note paper absorbs UV light and does not appear fluorescent under a ultraviolet light. Counterfeit currency usually appears very bright under ultraviolet light. The device can also be used for examining security documents such as cheques, credit cards, bankdrafts, passports, certificates etc.

Electronic starters are easy to access and change.
